

RESUME

February - 2026

1. PERSONAL DETAILS

Full Name: **Yaniv Tenzer**
Identity No: 021751573
Date of birth: 11/8/1983
Place of birth: Israel
Phone numbers: +972506513552
E-mail: yaniv.tenzer@gmail.com

2. ACADEMIC DEGREES

- 2016 PhD , Faculty of Industrial Engineering and Management, Hebrew University, Jerusalem, Israel Prof. Gal Elidan
- 2010 MSc , Faculty of Industrial Engineering and Management, Tel-Aviv University, Tel-Aviv, Israel Prof. Yoav Benjamini
- 2006 BSc (cum laude)(Summa Cum laude), Faculty of Mathematics, Bar-Ilan University, Israel

3. ACADEMIC APPOINTMENTS

- 2025 - Present Research associate, Faculty of Computer Science, Technion, Institute of Technology, Haifa, Israel
- 2019 - 2021 Postdoc, Faculty of Mathematics, Weizmann Institute of Science, Rehovot, Israel

4. PROFESSIONAL EXPERIENCE (OUTSIDE ACADEMIA)

- 2021 - 2024 Senior Quantitative Researcher, Meta LTD
- 2016 - 2021 Head of Growth Data Science, Lightricks LTD

2010 - 2012 Researcher, General Electric LTD

5. RESEARCH INTERESTS (BRIEFLY)

- Statistical Modeling
- Online Sequential Testing via E-processes
- Probabilistic Graphical Models
- Modeling of Dependence Structure (Copulas)

6. TEACHING EXPERIENCE

2010 - 2013 Statistical Inference, Lecturer , Tel-Aviv University

2019 - 2021 Advanced Statistical Inference, Lecturer , International
Course , Weizmann Institute of Science

2023 - 2024 Convex Optimization, Lecturer , Bar-Ilan University

2023 - 2024 Introduction to Machine Learning, Lecturer , Bar-Ilan University

2023 - 2024 Introduction to Probability, Lecturer , Bar-Ilan University

7. ACTIVITIES

8. DEPARTMENTAL ACTIVITIES

9. PUBLIC PROFESSIONAL ACTIVITIES

2017 - Present Reviewer, Journal of Machine Learning

10. MEMBERSHIP IN PROFESSIONAL SOCIETIES

- American Statistical Association

11. FELLOWSHIPS, AWARDS AND HONORS

2015 David Assaf prize for research achievements, , Statistics, Hebrew University, Jerusalem

2016 The president award for outstanding doctoral students , Statistics, Hebrew University,
Jerusalem

2022 The president's award for excellence in research, Applied Math and Computer Science,
Weizmann Institute of Science, Rehovot

12. GRADUATE STUDENTS

Completed PhD theses

Completed MSc Theses

PhD Theses in Progress

MSc Theses in Progress

13. SPONSORED LONG-TERM VISITORS AND POST-DOCTORAL ASSOCIATES

14. RESEARCH GRANTS

Competitive

Industrial and other sources

15. PUBLICATIONS

15.1 Theses

Learning High-Dimensional Copula Bayesian Networks - Theory and Applications,
Advisor: Prof. Gal Elidan
Department of Statistics, The Hebrew University, 2016

15.2 Refereed papers in professional journals

1. **Y.Tenzer**, M.Mandel, O.Zuk. Testing Independence under Biased-Sampling, Journal of American Statistical Association. 117(540), 2194-2206, 2022 (link)
2. **Y.Tenzer**, A.Moscovich, C. Spiegelman, B.Nadler. Beyond Trees: Classification with Sparse Pairwise Dependencies, Journal of Machine Learning, 21(189), 1-33, 2020 (link)
3. **Y.Tenzer**, Omer Dror, Boaz Nadler, Erhan Bilal, Yuval Kluger. Crowdsourcing Regression: A Spectral Approach. Journal of Machine Learning Research, 2022 (link)

15.3 Submitted papers

Y.Tenzer, Elad Tolochensky, Yaniv Romano. Betting on Predictions, 2025

15.4 Preprints

Y.Tenzer, G.Elidan. On the Monotonicity of the Copula Entropy, 2016 (link)

15.4 Refereed papers in conference proceedings

1. **Y.Tenzer** I. Slovetichik, A. Wiesel, G. Elidan. Discovering non-Gaussian Hidden Variables – The Generalized Ideal Parent Approach, International Conference on Artificial Intelligence and Statistics (AISTATS), (pp. 222-230). PMLR, 2016 ([link](#))
2. **Y.Tenzer**, K. Gimpel, T. Hazan. Constraints Based Convex Belief Propagation, International Conference on Neural Information Processing System (NIPS), (pp. 2540-2548), 2016 ([link](#))
3. **Y.Tenzer**, G. Elidan. HELM: Highly Efficient Learning of Mixed Copula Networks, International Conference on Uncertainty in Artificial Intelligence (UAI), (pp. 790-799), 2014 ([link](#))
4. **Y.Tenzer**, G. Elidan. Speedy Model Selection (SMS) for Copula Models, International Conference on Uncertainty in Artificial Intelligence (UAI), (pp. 625-634), 2013 ([link](#))
5. **Y.Tenzer**, O. Barkan, A. Averbuch, S. Dekel. A Mathematical Model for Extremely Low Dose Adaptive Computed Tomography Acquisition, Mathematical Models for Curves and Surfaces (MMCS), (pp. 13-33), 2012 ([link](#))

16. CONFERENCES

16.1 Plenary, keynote or invited talks

International

1. **Y.Tenzer**, S.Dekel, A Mathematical Model for Extremely Low Dose Adaptive Computed Tomography Acquisition, International Conference on Mathematical Methods for Curves and Surfaces (MMCS), Germany, 2012. (Invited Talk)
2. **Y.Tenzer**, G.Elidan, Speedy Model Selection for Copula Models, International Joint Statistical Meeting (JSM), USA, 2014. (Invited Talk)
3. **Y.Tenzer**, M.Mandel, O.Zuk, Testing Independence under Biased Sampling, Eastern Mediterranean Region of the International Biometric Society (EMR-IBS), Israel, 2022. (Invited Talk)

National

1. **Y.Tenzer**, O.Zuk, Testing Independence with Biased Sampling, ISA Annual Meeting, Israel, 2018. (Invited Talk)

16.2 Contributed Talks and Posters

International Oral

1. **Y.Tenzer**, Some New Theoretical Results on Copulas and their Implications, Dependence Modeling in Finance, Insurance and Environmental Science, Germany. 05-2015 .

International Poster

1. **Y.Tenzer**, G.Elidan, Speedy Model Selection (SMS) for Copula Models, Conference on Uncertainty in Artificial Intelligence (UAI), USA. 07-2013 .
2. **Y.Tenzer**, G.Elidan, HELM: Highly Efficient Learning of Mixed Copula Networks, Conference on Uncertainty in Artificial Intelligence (UAI), Canada. 07-2014 .
3. **Y. Tenzer**, I. Slovetichik, A. Wiesel, G. Elidan, Discovering non-Gaussian Hidden Variables – The Generalized Ideal Parent Approach, International Conference on Artificial Intelligence and Statistics (AISTATS) Intelligence, Spain. 05-2016 .
4. **Y.Tenzer**, K.Gimpel, T.Hazan, Constraints Based Convex Belief Propagation, International Conference on Neural Information Processing System (NIPS), Spain. 06-2016 .

National Oral

National Poster

16.3 Participation in organizing conferences

17. NOTES

To this end, my academic research has been mainly focused on the modeling of high-dimensional dependence structures, as well as the fundamental task of learning high-dimensional distributions from finite data. My work is based on the Copula construction and the Copula Bayesian-Networks framework. While my work emphasizes the methodological aspects of learning high-dimensional representations, I was lucky enough to make some theoretical contributions to the fundamental theory of copulas as probability measures.

My prospective research trajectory is marked by a fervent dedication to advancing the frontier of high-dimensional statistics. Beyond investigating the representation and learning of high-dimensional distributions from data, I wish to extend my work and to tackle some additional statistical challenges that commonly arise in high-dimensional settings. For example, one avenue of exploration involves pioneering novel multiple hypotheses testing techniques, designed to control the false discovery rate. Another research direction lies in the realm of conformal

inference, where I seek to engineer approaches that allow for distribution-free inference. This endeavor carries the potential to modify traditional methodologies that heavily rely on assumptions that commonly do not hold in practice (e.g., observed data follow Gaussian distribution etc.).

Finally, a recent research I have been pursuing is focused on the development of novel online-testing methodology that exploits ML predictions to gain power. While modern models achieve high predicting accuracy, it is not clear if and how ML predictions can be used to address the fundamental challenge of hypothesis testing. In my current research I develop ML-driven statistical testing procedures that are guaranteed to be valid, and at the same time, exploit predictions to gain power.
